# The Future of Steam Generating Technology

## Steam Ranger™ Generator Series

Steam Sauna is proud to introduce an innovative technology for next generation of residential steam bath products that rises above all conventional steam bath units in the market.

**Steam Ranger™ RV9 Steam Unit**

The new Steam Ranger™ Series offer variable output power, which is suitable for all steam shower sizes. When your initial design on the drawing board is revised and the actual construction changed in terms of room size and interior finish from ceramic tiles to marble, Steam Ranger™ still covers the variations, no need to upgrade or downgrade the unit, just adjust the density of steam accordingly.

With Steam Ranger™ Unit you have the complete flexibility of usage and can change the steam density from very low to very high as per individual needs. This provides great flexibility to the user and makes the steam bath experience as comfortable and user-friendly as it can possibly be.

- ◆ Compact & space saver
- ◆ One model covers all steam bath sizes\*
- ◆ Variable steam output according to steam shower demand
- ◆ Quiet, continuous steam
- ◆ Automatic flush
- ◆ Choice of various designer time & temperature controls

\*RV9 covers up to 375 cubic feet

**Steam Ranger™ is the coolest steam system you've ever seen**

**ENJOY  
AN UPPER LEVEL OF  
LUXURY AND LIFESTYLE**

**ENJOY  
NATURAL RELAXATION**

**ENJOY  
A BEAUTY TREATMENT**

**ENJOY  
A HEALTHIER BODY**

**ENJOY  
SIMPLE TRANQUILITY**

**ENJOY  
A STEAM BATH  
IN THE PRIVACY OF  
YOUR OWN HOME -**

**ANY TIME**

**Steam baths have been around for centuries and were deemed a luxury of high-end houses. However nowadays steam generators can be installed and used in every home.**

**Taking a steam bath regularly helps boost your immune system and relieves stress. A steam bath followed by a cold shower prepares you for a fresh energetic start and a warm shower for a good nights sleep. Steam improves blood circulation, has cardio vascular benefits, increases the pulse rate without raising blood pressure; as a result nutrients are carried to the skin making it healthy, glowing, soft and youthful.**

## Steam Generator Locations

Install SteamBath™ steam generator under the vanity, in an adjacent closet, on a shelf or in the basement, may be up to 50 feet (15 m) from your steam room, making it feasible to locate in a space most suitable.

### Select the SteamBath™ steam generator refer to Model Selection Table

Calculate the Steam Room's volume (V) in cubic feet by multiplying its length x width x height (in feet)

Based on construction design determine one of the highest applicable factors from the following and multiply it with V

1. If Natural Stone, Marble, Slate, Granite is used, multiply V by 2.0
2. If Ceramic Tiles, Glass Tile or Block is used, multiply V by 1.3
3. If there is an external wall or steam room is in the basement, multiply V by 1.60

For your own steam room simply enclose your shower stall or your bathtub and enjoy a steam bath in comfort.

# A Study of Technology Par Excellence

## SteamBath™ Residential Steam Generators

### Advance Features

- ◆ Compact, easy to install
- ◆ Energy efficient, inexpensive to operate
- ◆ Super quiet operation, continuous smooth steam
- ◆ Completely controlled by programmable microprocessor
- ◆ Electronic steam room thermostat and sensor for accurate steam room temperature
- ◆ Maintenance free electrical probe for water level control
- ◆ Built-in 90 min safety shut off
- ◆ Automatic flush system removes sediments, prevents calcium build up, programmed to refill fresh water for next steam bath, makes it hygienic
- ◆ Exclusive drain cooling system cools hot water before flushing, meets building code, safe for user
- ◆ Motorized drain valve with option for manual flushing as needed

**Regular Series**  
**RS50, 100, 150, 250**

### Model Selection Table, based on steam room size

MODEL NO.	KW MAX	CU FT RANGE	AMPS	MAX DIM L x W x H	WEIGHT
RS50	3.0	90	13	17"x7"x10"	19 lbs
RS100	4.5	150	19	17"x7"x10"	20 lbs
RS150	6.5	250	27	17"x7"x10"	20 lbs
RS250	8.5	375	38	17"x7"x10"	21 lbs
RS300	11	500	46	20"x9"x10"	26 lbs
RS400	13	600	54	20"x9"x10"	26 lbs
CS15	15	700	63	20"x9"x14"	35 lbs
CS18	18	800	75	20"x9"x14"	35 lbs
RV9	8.5	375	38 max	14"x5"x12.5"	24 lbs
